

Awards

The Biomag 2014 awards program supports and recognizes research excellence in the field of biomagnetism.

Prizes will be presented at the awards ceremonies at the Biomag 2014 Gala Dinner.

The members of the Awards committee can be found on our website "Biomag2014" under "Committees".

James Zimmerman Prize

The James Zimmerman Prize (JZP) is an award celebrating the early pioneering work of James Zimmerman in the applications of SQUID technology. The International Advisory Board (IAB) and BioMag2014 collaborate with the International Federation of Medical and Biological Engineering (IFMBE) for the JZP. The IFMBE has agreed to sponsor the award (a JZP plaque and 1,000 euros) on a biannual basis during the BioMag conference. The IAB and BioMag2014 are looking forward to working with members of the IFMBE in acknowledging the contributions of James Zimmerman to the biomagnetism and biomedical engineering communities.

The winner will be awarded: a JZP plaque and 1,000 €

The JZP has been awarded to Dr. Myriam Pannetier-Lecoeur (Saclay, France).

She will be receiving the award during the BIOMAG 2014 business meeting on Thursday Aug 28. She will be describing her work ("mixed sensors") during the HOT TOPIC session Wednesday afternoon. We thank the JZP committee (chair Dr. John Mosher) for their hard work.
